

'TRIPLE WIN' ROULETTE

RULES FOR TRIPLE WIN ROULETTE

The rules for Triple win Roulette at this casino, set out below, are our commitment to the players in ensuring that the gambling we offer is 'Fair and Open'. Any complaints or disputes should be brought to the immediate attention of Venue Management for resolution.

Triple win roulette is played in tandem with a standard game of American Roulette. Both games can be played individually or simultaneously.

- The player plays against the House.
- Triple win Roulette uses a standard Roulette wheel, comprising of 37 numbers. Each number pocket is divided into three equal sections.
- The 3 equal sections comprise of a gold middle section and two black sections on either side.
- Players can place a separate Triple Win bet on the Triple Win number grid in addition to the standard bets on the main American roulette betting field.
- To win the ball must come to rest in the gold section, of the winning number.
- The wheel is spun in one direction by the Dealer and the ball is always spun in the opposite direction.
- The players can place their bets on the layout either before the ball is spun or during the time that the ball is spinning but may not place, change, or alter any bets after the Dealer has announced 'No more bets'.
- All wagers placed are only valid for one spin.
- When the ball has settled in the gold section of a number, that number is deemed to be the Triple win winning number and the players are paid out odds of 105 to 1.
- If the ball settles in any black section of a number, the bet will lose.
- All wagers must be within the specified minimums and maximums displayed at the table.
- Partnerships with a view to exceeding the maximum stake shall not be permitted.
- Any bets not associated with the winning number are lost and surrendered to the House.
- Should a 'No spin' occur, then the wagers on the layout are void and will be valid for the next spin.
- The accuracy of the number display cannot be guaranteed.

A PLAYER'S GUIDE TO THE HOUSE EDGE

The House Edge is a measure of how much the House expects to win, expressed as a percentage of the

player's wager. For example, in a wager with a House Edge of five per cent the player will lose, on average over time, £5 for every £100 wagered.

House Edges vary by region, casino and game. In some games, player betting or skills decisions can affect the Edge, but it's important to keep in mind that the House always has some advantage against the typical player.

THE HOUSE EDGE FOR 'TRIPLE WIN' ROULETTE: 4.5%

THE HOUSE EDGE FOR ROULETTE: EVEN CHANCE WAGERS IS 1.35% ALL OTHER BETS WAGERS ON THE LAYOUT IS 2.70%
